

Brick Scavenger Hunt *in Roebling Village*

This family-centered activity packet ends in a scavenger hunt of bricks in the village of Roebling, NJ.

With this activity:

- you'll look harder at bricks than you've ever done before.
- you will learn about where and how local bricks were made
- and you'll become a brick design expert!

GETTING STARTED

About how many bricks did it take to build all the homes, stores, and public buildings in the original village of Roebling?

a) 1,000	с) 10,000
b) 100,000	d) one million

Where were most of Roebling's bricks made?

- a) Within 3 miles of Roebling
- b) Within 20 miles of Roebling
- c) In Europe
- d) Out west

Brick Scavenger Hunt

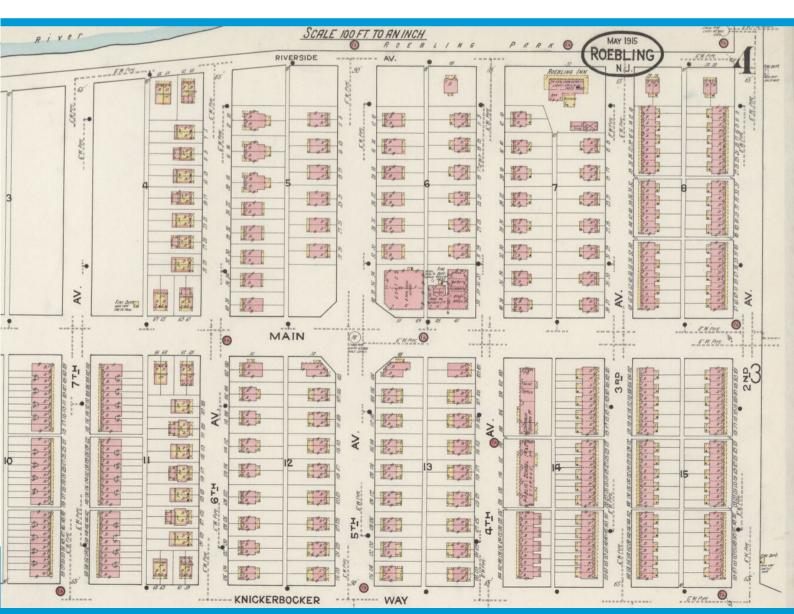

MAPPING ROEBLING

On this map, Pink = made of brick. Yellow = made of wood.

- What looks the same and what looks different?
- Why are some buildings both pink and yellow?

Check out this map of Roebling from 1915!

- Where is the Post Office today?
- Can you find your house?

BRICK BASICS

We walk by them (and on them!) all the time, but have you ever stopped to wonder how bricks were made in 1905 when Roebling was being built?

Here's how it's done:

Step 1: Mine sand and clay

Step 2: Mix the sand and clay together

Step 3: Form the brick shape

Step 4: Let the bricks dry

Step 5: Pile the brick up neatly

Step 6: Heat the bricks in a massive oven

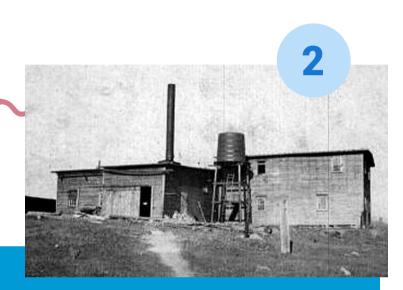

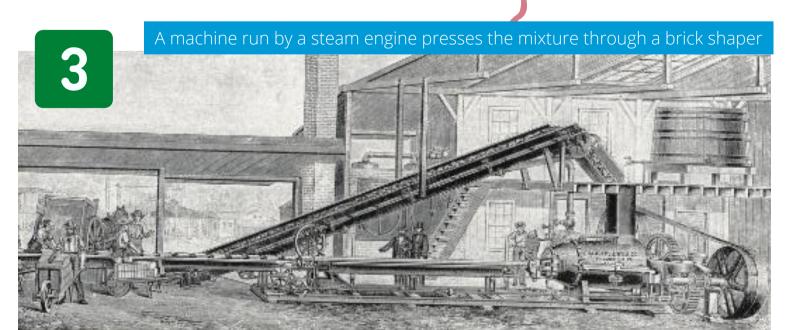

BRICKS AT WORK

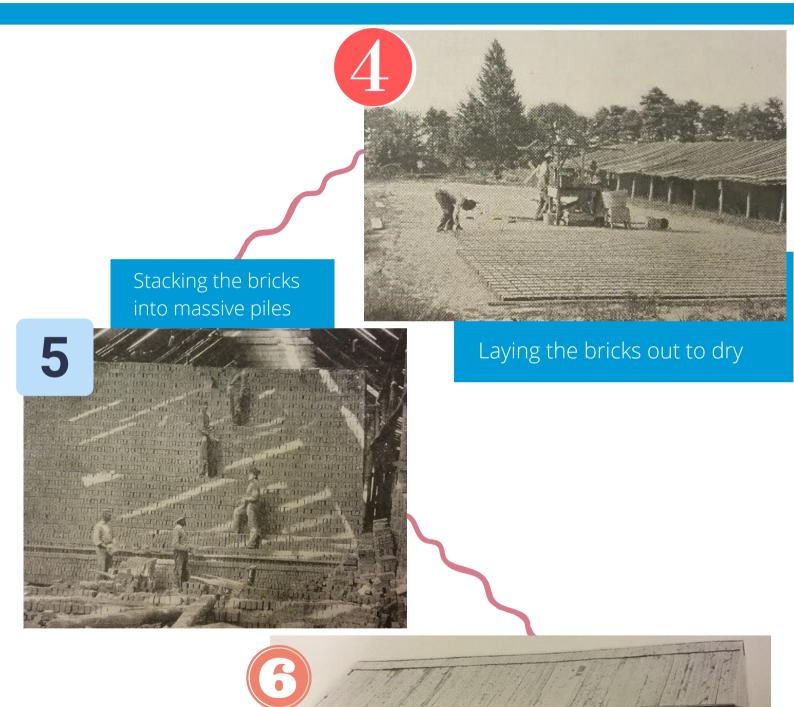

Workers mining clay and sand

Water was added to the clay and sand and stirred and kneaded in this building

Brick Scavenger Hunt

Bricks are heated to very high temperatures for a few days

We now know that bricks are made with sand and clay. But where were the sand and clay come from?

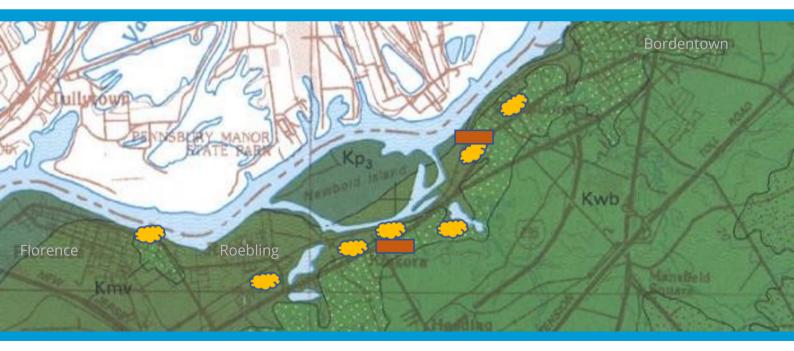

FINDING BRICKS

Using the map below, locate Roebling and Bordentown

This symbol shows where clay and sand were mined.

This symbol shows the locations of brick yards where clay and sand were mixed together and made into bricks.

What does this tell us?

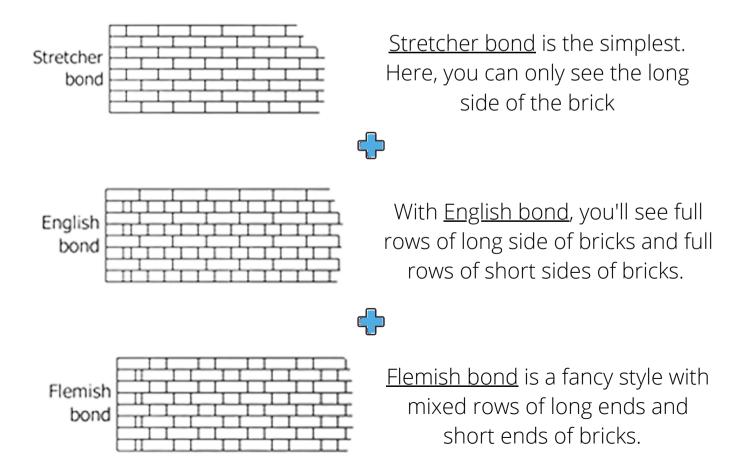

The two main brick yards that supplied the bricks in Roebling today were made locally in Kinkora and in the Fieldsboro area

BRICK LAYING AS ART

As we saw in the first map, in Roebling, houses, schools, and stores are made of brick. Some patterns are made to be extra strong and others are designed to be ornamental or for decoration.

Here are some brick laying patterns used in Roebling:

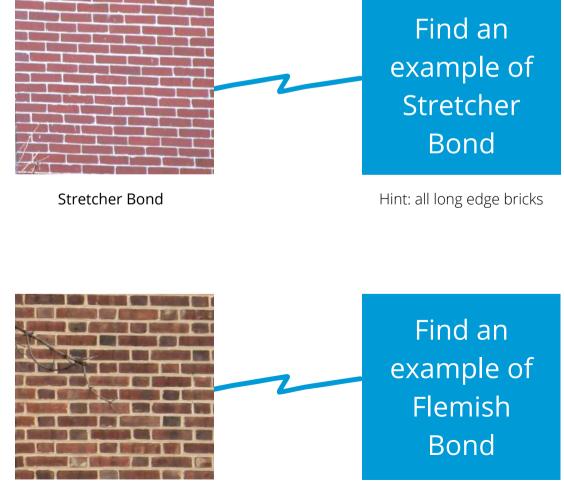

GO FIND THE BRICKS!

Get outside. Walk around. Look for bricks.

Use these real photos of Roebling bricks to help your search

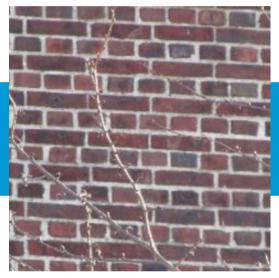

Flemish Bond

Hint: long short long short

Find an example of English Bond

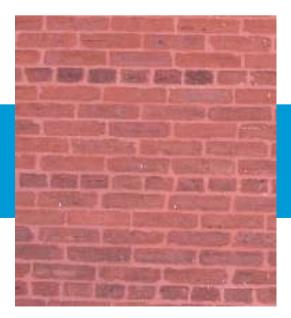

Hint: Look for full rows of long bricks and full rows of short bricks. English Bond can look different depending on the distances between patterned rows.

1-1 pattern 1 row of long 1 row of short

1-6 pattern 1 row of short 6 rows of long

1-5 pattern 1 row of short 5 rows of long

1-7 pattern 1 row of short, 7 rows of long

WINDOW DESIGNS

Building a brick building can be tricky, especially when it comes to windows. When the brick pattern is interrupted by door or window openings, brick layers have to get creative.

Find examples of brick patterns around windows

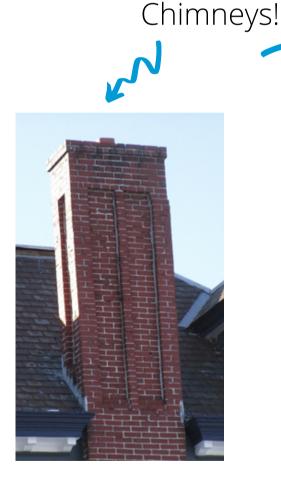

(Here are some that we spotted)

OTHER USES FOR BRICKS

What else is made out of bricks in Roebling?

Thanks for using our family-centered activity packet! We hope you had fun learning about bricks, and learning more about the local history of Roebling, NJ.

LET US KNOW

This is the first family activity packet that we've created and we'd love to hear your feedback. What was good, bad, unremarkable? Do you have a topic you'd like to see next?

Send us an email to tell us what you thought! <u>lynne.calamia@roeblingmuseum.org</u>

Share your adventure on social media and tag us. we'd love to see what you find!
